

115volt system

Calix introduces during the spring a replacement for the present UMV heater. The new model for 115volt system with designation **ProHeater** (Professional Heater), has some product improvements such as the size, which facilitates the installation. The new heater is also equipped with a rubber sealing for increased service life and reliability.

Our thoroughly-tested heater is equipped with overheating protection and a thermostat. The heater is delivered as a complete kit, consisting of a plug-in connector, bracket and connecting cable or only as a heater with bracket. The picture shows the product in actual size.
